## Limit Switch

## HER

## APPLICATION

The limit switch HER has been designed for a maximum of safe operation under severe conditions to become installed in any bulk handling system. All external parts are either of stainless steel or have been specially plated.
The trip points - both preset at $10^{\circ}$ - can be changed within 5 and $15^{\circ}$ resp. 15 and $35^{\circ}$ by means of adjustable cams.

The roller lever is continuosly adjustable on the shaft. For safety applications the lever has to be bolted with the shaft.
The positiv making and selfcleaning switching elements also qualify the switch to be used the classical relay circuits as well as cable signalling devices such as field buses.

## TECHNICAL DATA

| Device complies with | EN 60947-5-1 <br> EN 60204 <br> VDE 0110 - Degree of Pollution 2 |
| :---: | :---: |
| Enclosure | Aluminium alloy, GK-AlSi12 |
| Actuating roller lever | Roller: CuZn39Pb3, lever: AlMgSi1 |
| Finish | 2-component DD-tile enamel yellow, RAL 1004 |
| Fastening | 2 oblong holes for M 8 -bolts |
| Cable entry | $2 \times \mathrm{M} 25 \times 1,5$ |
| Protection | IP 67 according to EN 60529 |
| Rated insulation voltage $\mathrm{U}_{\mathrm{i}}$ | AC 380 V , DC 250 V |
| Earthing | Within enclosure, M5 |
| Admissible ambient temperature ${ }^{11}$ | $-25^{\circ} \mathrm{C} \ldots+70^{\circ} \mathrm{C}$ |
| Switching elements | Snap acting switches, positive making and self cleaning |
| Number of contacts | 2 changeover contacts SPDT |
| Conventional thermal current $\mathrm{I}_{\text {th }}$ | 10 A |
| Breaking capacity $\mathrm{I}_{\mathrm{e}} / \mathrm{U}_{\mathrm{e}}$ | $4 \mathrm{~A} / \mathrm{AC} 230 \mathrm{~V}$ |
| Connections | $2,5 \mathrm{~mm}^{2}$ |
| Mechanical life | 0,5 $\times 10^{6}$ switching cycles |
| Excursion | $75^{\circ}$ max. |
| Maintenance | Free |
| Ordering code | 92.057.020.606 |

${ }^{1)}$ Deviating ambient temperature upon request
Note: The devices may be used in control circuits only!
